

# Traumatic Brain Injury Data Collection

## Arizona Profile

### Data Collection Information

#### Injury Core Capacity Development

Arizona is one of 28 states receiving CDC funding to conduct injury surveillance as part of an overall plan for injury control. The general injury data collected for the Core Capacity program examine causes of injury rather than the nature of the injury itself. Arizona is one of four Core states that receive enhanced funding to monitor traumatic brain injury (TBI) risk factors.

#### State Injury Indicators Data

Arizona is one of 26 states participating in the Injury Indicators program coordinated by CDC, with input from CSTE and STIPDA. Participating states voluntarily analyze hospitalization and death data to track, monitor, and report on various injuries and risk factors, including TBI. Note that this program uses a restricted definition of TBI.

#### Traumatic Brain Injury (TBI) Surveillance

Arizona is one of 12 states receiving CDC funding for ongoing, systematic collection and analysis of TBI data as part of the Traumatic Brain Injury Surveillance Program. Through this program, each participating state characterizes TBI risk factors, incidence, external causes, severity, and short-term outcomes via population-based surveillance of TBI-related hospitalizations and deaths.
